Parham, Angel A. *American Routes: Racial Palimpsests and the Transformation of Race*. New York: Oxford University Press.

- Co-winner Allan Sharlin Memorial Book Award, Social Science History Association, 2018
- Co-winner, Barrington Moore Prize in Comparative and Historical Sociology, American Sociological Association, 2018
- Honorable Mention, Thomas & Znaniecki Best Book Award, International Migration Section, American Sociological Association, 2018
- Focus of Author-Meets-Critic panel at the Social Science History Association, 2018, Phoenix, AZ

American Routes provides a comparative and historical analysis of the integration of white and free black refugees from nineteenth century St. Domingue to Louisiana and then examines the racial and cultural experiences of their descendants two hundred years later. The case goes counter to the usual practice of using the migration of Europeans (eg. Italians, Irish, Jews, etc) to the U.S. in the nineteenth century as the source of the primary historical case studies sociologists use as the baseline to theorize today's immigrant integration. There has not, until now, been a sociological examination of a large group of free black nineteenth century immigrants that could provide a more accurate baseline for considering the migration and integration of today's immigrants of color.

Book Projects in Progress

A Place to Remember: Uncovering Another America

With this study I aim to present an alternative reading of U.S. history and national identity by examining and comparing *lieux de souvenir* — sites whose histories allow us to peel away the layers of seemingly settled places and identities in order to recover the mixture and hybridity that have become submerged beneath dominant narratives of who we are as U.S. Americans.

Mirrored Lives: Toward a New Conversation on Race, Class and Inequality

With this work, I use the capabilities approach elaborated by Amartya Sen and Martha Nussbaum to compare and contrast the impacts of race and inequality in the wealthiest and poorest countries in the Western hemisphere: the U.S. and Haiti. The comparison involves examining the histories of race and disadvantage in each area and documenting the lives and life chances of children and families in low-income African-American households in New Orleans compared to those of persons with a comparable standard of living in Haiti. The “Mirrored Lives” study responds to research which shows the surprising and disturbing resonances between the diminished life chances of low income African Americans and those of disadvantaged persons living in developing countries. Fieldwork and data collection began with families in Haiti and New Orleans in July 2017 and will extend through December 2020. (See the following for research by Shaefer et. al. that illustrates these similarities:
