To: Uriel Quesada <uquesada@loyno.edu>

Associate Deans need to support our outreach efforts to faculty to increase enrollments in summer school. This revenue is urgently needed to help us move toward Project Magis goals.

Urge advisors to advise students for summer as well as fall.

May Term is new and great opportunity to get 3 credits in two weeks.

We will send fliers for distribution before advising. Please send to all advisors. Important for students who:

- a) have failed or are in danger of failing required courses/LC courses
- b) are changing majors and need to make up courses required in new major
- c) off track for graduation
- d) are in credit-intensive majors and need extra courses

Message to freshmen and sophomores, if you are in any of these categories, you could need an extra semester to graduate. Much cheaper to take summer courses than a full extra semester. Summer tuition is lower than regular year.

We will visit College assemblies to talk with faculty. If ADs get questions, please refer to McKay

****Most important, do you absolute best to get faculty to post summer syllabi in LORA during week after Mardi Gras if not already posted. Students will be shopping for summer courses. Even if daily assignments not complete, post general outlines. If message from deans would help make this happen, plse ask your dean to do it.**

That's enough for now. Thanks so much.

M
